

A New Order or No Order? Continuity and Discontinuity in the EU-China-US Relationship

International Conference Friday, 29 September 2017

College of Europe, Verversdijk 16, Bruges, Belgium

The new US administration appears to have adopted policies that represent a discontinuity with those pursued by its predecessors over many decades since World War II and to have rejected the existing order. At the same time, China has been seeking to play a new role on the global stage that challenges the established order. The EU faces internal and external threats in defining its role in the world where its preferred multilateral order may no longer be sustainable. This conference will consider the extent to which the ongoing changes are fundamental discontinuities in the EU-China-US triangle, or whether they actually leave the underlying geometry unchanged, especially in a situation where it is unclear following the election of Donald Trump as president if one side in the triangle has chosen no order over a new order. The conference will focus on the continuities and discontinuities in the fields of trade and investment, foreign and security policy, and climate and energy policy. The position of other major powers outside the triangle in defining the EU-China-US relationship will also be taken into account.
